Reference Number: STS_2024_01

Product Owner Software Solutions (m/f/d)

Location:

Germany, Aachen

Worktime:

What we do - And why!

Mobility connects people. People shape mobility. With over 7,300 employees around the globe, we develop revolutionary and efficient drive systems, we cross-link vehicles with each other and their surroundings, and we strive to make our lives safer using intelligent systems. We need the right people at the right place to do so. People who turn visions into reality – who think outside the box and promote innovation. People who are ready to push the envelope. Are you ready?

Tasks

You will be involved in the digitalization of this industry in what is probably the most exciting time since the invention of the automobile.

As a Product Owner Software Solutions (m/f/d), you represent the product vision and see yourself as the connector between our customer's requirements and our development team.

You understand the customer's use case, suggest technical options for implementation and keep an eye on practicability and future viability.

You maximize the value of the resulting solution for the customer without losing sight of time and cost constraints.

You structure the backlog in close cooperation with the development team.

If necessary, you will draw on the support of a sw architect, requirements manager and project manager to achieve your goals.

We work agile in distributed teams, practice remote work and maintain an open communication culture.

Qualification

- Technical apprenticeship or degree in the field of software, IT, mechanical engineering, mechatronics or something comparable

- Several years of professional experience with software solutions in test fields

- Previous knowledge of engine test benches (EOL testing)

- Sound knowledge of current technologies in the

field of software and IT

(server-client architectures, networks, databases, IoT, cloud technologies)

Previous knowledge in dealing with CAN / CAN-Open

High degree of communication skills and experience in dealing with customers

User-oriented way of thinking

Familiarity with agile working methods

Previous knowledge of Confluence and Jira is an advantage

What we offer

Shape the mobility of tomorrow
Work on innovative and cutting-edge challenges.

Work flexible
Our flexible model of scheduling work, our attractive remote-work-model and our office daycare (site-dependent) center will allow you to find a perfect balance between your personal and professional life.

Expand your horizons
Not only will working on new technologies every day help you improve yourself, but our continuing education program will also help you stay up to date at all times.

Keep in shape
An extensive offering of company sports activities (site-dependent) and company health management will keep you in shape and ensure you are well balanced.

Experience appreciation
An attractive base salary and numerous other benefits offer new opportunities for you.
