VEHICLE ELECTRONICS CONFORMANCE TESTING

Let FEV subject your component to custom, rigorous independent testing to verify that it integrates with the OEM vehicle systems, ensuring vehicle safety and OEM equipment compatibility. Our seal of approval means that the vehicle system integrity remains intact.*

EXAMPLES OF TESTS

- CAN / J1939
- Software Design
- EMC
- Hardware Design
- IOD
- Reverse Battery
- LIN
- Mechanical
- Device Integration

ANALYSIS INTEGRATION EXPERTS

- Robust Design
- Greater OEM Acceptance
- Improved Customer Experience
- Higher Compatibility Accuracy
- Fewer Product Returns
- Improved Installer Confidence

FEV INC.

FEV is an OEM and Tier1 supplier. We assist our partners with integrating their products into the OEM vehicle. We focus on the entire vehicle system. FEV collaborates with OEMs, Tiers and Aftermarket suppliers to develop and validate electronic designs.

Areas of expertise include:

- Vehicle Networks
- Telematics
- Embedded Software
- ECU/Subsystem Hardware
- Communication Gateways
- Test Systems and Validation

INSTALLERNET

InstallerNet specializes in merchandising and coordinating consumer electronics installation services through the nation's largest network of independently owned mobile and home electronics installers. They provide professional installation services via the patent-pending InstallCard.

The InstallCard is similar to a gift card - allowing consumers to prepay for fixed scope of installation work at the time they purchase an installable product. InstallerNet backs the appointment with professional customer service and the best warranties in the business.

The InstallCard can be used to aid sales on the web and through distributors to ensure a quality installation. For more information, please visit www.InstallerNet.com or a retailer, such as Office Depot.
